M/T TERN DAL JOINS TERNTANK FLEET – POWERING THE TRANSITION TO BIO-BASED SHIPPING

Yangzhou, China – 27 November, 2025 – Terntank proudly announces the delivery of **M/T Tern Dal**, the third vessel in its pioneering **Hybrid Solution Plus®** series, built by **China Merchants Jinling Shipyard (Yangzhou) Dingheng**. The vessel will enter a **long-term charter with Neste**, a global leader in renewable fuels and sustainable solutions.

Marking the **ninth vessel** delivered from the same shipyard to Terntank, M/T Tern Dal strengthens the company's position at the forefront of sustainable shipping. Designed specifically for transporting **renewable feedstocks and bio-based products**, the vessel plays a vital role in decarbonising supply chains and supporting the energy transition.

Equipped with a **methanol-ready engine, hybrid battery pack, shore power connection, and wind-assisted propulsion**, M/T Tern Dal exemplifies Terntank's commitment to continuous innovation and measurable climate action.

*"M/T Tern Dal represents more than another vessel delivery – it's a symbol of progress" say owners **Tryggve Möller, Rigmor Möller, John Sten and Annika Kristensson**. "Each ship in the Hybrid Solution Plus series brings us closer to fossil-free operations and demonstrates what collaboration can achieve."*

Following her maiden voyage from Southeast Asia to Europe, M/T Tern Dal will join **Neste's logistics chain in Northern Europe**, contributing to lower emissions and more sustainable transport of renewable products.

"Neste has been an important partner in this journey. Together, we are reshaping what responsible shipping looks like – not in theory, but in everyday operations," the owners add.

With the successful delivery of M/T Tern Dal, Terntank once again extends its appreciation to the **entire Terntank team, both the dedicated crew at sea and the staff on shore, as well as the shipyard and partners** whose commitment to quality and environmental performance makes every milestone possible.
